
National Children's Commissioner Ms Megan Mitchell,

We are pleased submit to the Australian Human Rights Commission the views of *eChildhood* on how Australia is progressing or not progressing in terms of implementing the Convention on the Rights of the Child, relevant to children's access to online pornography.

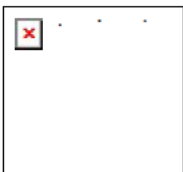

We have attached our submission that includes an Executive Summary, introduction to our health promotion charity, the problem we are addressing, relative clusters and articles identified by the Committee, and key arguments and recommendations. We also attach a copy of our *Porn Harms Kids Report*. *eChildhood* strongly encourages the reader to consider *The Porn Harms Kids Report* in its entirety, and promote the adoption of key recommendations to the Australian Government in order to progress Australia's implementation of the Convention on the Rights of the Child.

Could you please notify receipt of this email, and advise when to expect our submission to be made publicly available?

Kind Regards
