

Submission 116

I have been harassed by a colleague at work. She tried to place her hands on me during a work party inappropriately. She made sexual jokes and talked to my other colleagues that I was flirting with her. which when I confronted her denied the accusation. Months later she posted abusive content about me on social media and also damaged my car. However this was recorded in the cctv camera but nothing was done as the women made false claims during the process.
